PROFESSIONAL SUMMARY

Artificial Intelligence & Data Science engineering student passionate about building user-focused digital products through software engineering, AI frameworks, and modern web technologies. Experienced in full-stack web development, machine learning pipelines, and participating in innovation initiatives from concept to deployment.

EDUCATION

Maharaja Institute of Technology Thandavapura, Mysuru Expected Graduation: 2028
Bachelor of Engineering (B.E.) in Artificial Intelligence & Data Science | VTU
Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Machine Learning, Image Processing, Software Engineering

EXPERIENCE

AIQuantum Smart Solutions Pvt. Ltd. Aug 2025 – Sep 2025
Machine Learning & Deep Learning Intern (Training Program)

- Applied machine learning and deep learning concepts using Python, TensorFlow, NumPy, and Pandas.
- Performed data preprocessing and dataset preparation for ML model training and validation.
- Built image classification models and explored Google Teachable Machine workflows for rapid AI prototyping.

Tech Vedhu May 2025 – Jul 2025
Full Stack Web Development Intern (Training Program)

- Built responsive web applications and custom portfolio components using HTML5, CSS3, JavaScript, and React.js.
- Designed intuitive user interfaces applying core UI/UX principles and integrated AI-assisted tools to improve workflow output.

FEATURED PROJECTS

DiscoverBuddy — React, Tailwind CSS, Firebase, Mapbox

- Student-powered travel platform connecting visiting travelers with local student guides in real time.

MEMOIR (In Development) — React, TypeScript, Tailwind CSS, PostgreSQL

- AI-powered digital memory platform designed for unstructured media storage and personal entry logging.

QuickSort — Python, TensorFlow Lite, Raspberry Pi, ESP32-CAM, IoT

- Smart waste management ecosystem utilizing real-time image recognition on embedded edge devices.

CORE TECHNICAL SKILLS

Languages:	Python, Java, JavaScript, SQL
Web Tech:	React.js, HTML5, CSS3, Tailwind CSS, Firebase, MySQL, MongoDB
AI & Data Science:	Machine Learning, Deep Learning, TensorFlow, NumPy, Pandas, Image Processing
Tools & Design:	Git, GitHub, Google Cloud, Postman, VS Code, Figma, Canva

CERTIFICATIONS

- Google Cloud Career Launchpad – Cloud Engineer Track** | Google Cloud (May 2026)
- Generative AI for Data Science with Copilot** | Coursera (Nov 2025)
- The Complete Web Development Bootcamp** | Udemy (Feb 2026)

LEADERSHIP & ACHIEVEMENTS

- Leadership:** Technical Head at WINGS of MITT Aero Club (2025–Present) | Technical Team Member at E-Cell MITT Club (2026–Present)
- Awards:** First Prize – MITT Ideathon 2025 | Second Prize – Sigma Ideathon 2025
- Innovations:** Finalist at Grassroots Innovation Challenge (Govt of Karnataka, 2025) & Vision Mysuru 2050 Challenge (2026)
- Exhibitions:** Selected to present QuickSort startup concept at E-Summit 2025, IIT Bombay
